Trust in the most **personalized** and natural hearing

Our ears work together in a wonderful way known as binaural hearing. This is when our brains receive information from each of our ears, and empower us to listen selectively and understand our surroundings while hearing. Average hearing aids find it difficult to imitate this, but Beltone Trust includes two groundbreaking innovations that help you hear in this more natural way: Personal Sound ID™ and Crosslink Directionality™ 2.

More natural hearing with Personal Sound ID

This unique feature helps restore the natural sound level differences between your ears. You benefit from a richer sound palette and the ability to hear where sounds originate from.

A complete sound experience with CrossLink Directionality 2

CrossLink Directionality 2 offers you truly individual listening by monitoring your sound environment and automatically switching to the most natural speech focus settings. It combines with Personal Sound ID to help you to better recognize voices and the direction sounds come from. And you'll understand that speech better, too. According to a recent study*, Beltone hearing aids make it significantly easier to understand speech than major competitors. This is especially true when you want to hear someone talking behind you or to your side.

Trust in great sound

Your Beltone Trust hearing aids adapt to you and your lifestyle. You'll enjoy a new level of hearing quality in a wider range of situations.

Smart Gain Pro™ adjusts volume, adapting automatically to changes in your environment. Whether you are in a noisy, crowded restaurant or a quiet park, your hearing will be at its best.

Feedback Eraser™ with Whistlestop™ cancels feedback for your comfort. This means you don't have to endure unpleasant noises and whistling that can sometimes occur when you use your phone or hug a loved one or friend.

Ear to Ear synchronization means that you can easily move from a quiet place to a noisier one. This feature monitors your environment and automatically coordinates your hearing aids, so you always experience a smooth sound transition.

Trust in personal control

The **Beltone HearMax** app gives you an easy and discreet option to control your hearing aids. Simply download the free app and start adjusting volume, listening programs and much more directly from your iPhone, iPad, iPod touch, Apple Watch or the most popular Android phone models. Access it all from an new, intuitive one-tap main screen.

The Beltone HearMax app lets you change volume, programs and much more directly from your smartphone or tablets.

Trust that you'll always stay connected

Direct audio streaming (Made for iPhone)

Innovative wireless technology enables you to stream sound directly from your iPhone, iPad or iPod touch to eight different Beltone Trust hearing aid models, without having to wear any sort of adapter around your neck. So you can hear voices from phone calls, listen to your favorite music or follow the voice directions of a GPS – all through your Beltone Trust hearing aids.

Beltone. Helping the world hear better

Beltone was founded on the act of helping a friend to enjoy life more. Since 1940, we have provided knowledge, tools, service and training to the professionals servicing the hearing impaired. Beltone makes quality hearing care available to more people. To do so, we develop technically optimal hearing solutions without ever losing focus on the individual's needs. It is our belief that no individual should be denied the possibility of an improved life with better hearing.
